OBJECTIVES

THIS TRAINING SESSION IS ONLY A STEP IN THE CONTINUOUS FIGHT AGAINST "DRUNK DRIVING". IT IS DESIGNED SO THAT AFTER THE TRAINING, THE OPERATOR WILL BE AWARE OF:

- 1. THE INFORMATION THAT NEEDS TO BE COMPILED TO HAVE A STRONG DUI CASE IN COURT.**
- 2. THOSE QUESTIONS WHICH ARE LIKELY TO BE ASKED DURING THE OPERATOR'S TESTIMONY.**
- 3. THE NECESSARY STEPS TO ACHIEVE AN OBJECTIVE AND RELIABLE TEST RESULT, E.G., 20 MINUTE ALCOHOL DEPRIVATION PERIOD PRIOR TO TESTING.**
- 4. THE BASIC OPERATION OF THE INSTRUMENTS USED FOR BREATH TESTING, INCLUDING ANY INFORMATIONAL MESSAGES GENERATED.**
- 5. THE PRACTICAL AND THEORETICAL ASPECTS RELATED TO BREATH ALCOHOL TESTING.**

OPERATOR'S TESTIMONY IN COURT

YOU MAY BE ASKED ABOUT:

- 1. YOUR OPERATOR'S CERTIFICATION.**
- 2. INSTRUMENT (AGENCY) CERTIFICATE:
THE OFFICER IN CHARGE OF THE
PROGRAM AT THE AGENCY MAY ANSWER
THIS QUESTION.**
- 3. ADMINISTERING THE TEST STEP-BY-
STEP ACCORDING TO THE KANSAS
APPROVED PROTOCOL.**
- 4. THE ALCOHOL DEPRIVATION PERIOD.**
- 5. THE DEFENDANT'S CONDITION WHILE IN
THE OFFICER'S PRESENCE.**

Chapter 8.--AUTOMOBILES AND OTHER VEHICLES

Article 10.--DRIVING UNDER INFLUENCE OF ALCOHOL OR DRUGS; RELATED PROVISIONS

8-1001. Tests for alcohol or drugs; request by officer, grounds; consent implied; administration of tests, when; procedures; immunity from liability; warning statement; search warrant, admissibility of test; availability of test result; remedial nature of law. (a) Any person who operates or attempts to operate a vehicle within this state is deemed to have given consent, subject to the provisions of this act, to submit to one or more tests of the person's blood, breath, urine or other bodily substance to determine the presence of alcohol or drugs. The testing deemed consented to herein shall include all quantitative and qualitative tests for alcohol and drugs. A person who is dead or unconscious shall be deemed not to have withdrawn the person's consent to such test or tests, which shall be administered in the manner provided by this section.

(b) A law enforcement officer shall request a person to submit to a test or tests deemed consented to under subsection (a): (1) If the officer has reasonable grounds to believe the person was operating or attempting to operate a vehicle while under the influence of alcohol or drugs, or both, or to believe that the person was driving a commercial motor vehicle, as defined in K.S.A. 8-2,128, and amendments thereto, while having alcohol or other drugs in such person's system, or was under the age of 21 years while having alcohol or other drugs in such person's system; and one of the following conditions exists: (A) The person has been arrested or otherwise taken into custody for any offense involving operation or attempted operation of a vehicle while under the influence of alcohol or drugs, or both, or for a violation of K.S.A. 8-1567a, and amendments thereto, or involving driving a commercial motor vehicle, as defined in K.S.A. 8-2,128, and amendments thereto, while having alcohol or other drugs in such person's system, in violation of a state statute or a city ordinance; or (B) the person has been involved in a vehicle accident or collision resulting in property damage or personal injury other than serious injury; or (2) if the person was operating or attempting to operate a vehicle and

KANSAS STATUTES

8-1001 (Continued)

such vehicle has been involved in an accident or collision resulting in serious injury or death of any person and the operator could be cited for any traffic offense, as defined in K.S.A. 8-2117, and amendments thereto. The traffic offense violation shall constitute probable cause for purposes of paragraph (2). The test or tests under paragraph (2) shall not be required if a law enforcement officer has reasonable grounds to believe the actions of the operator did not contribute to the accident or collision. The law enforcement officer directing administration of the test or tests may act on personal knowledge or on the basis of the collective information available to law enforcement officers involved in the accident investigation or arrest.

(c) If a law enforcement officer requests a person to submit to a test of blood under this section, the withdrawal of blood at the direction of the officer may be performed only by: (1) A person licensed to practice medicine and surgery, licensed as a physician's assistant, or a person acting under the direction of any such licensed person; (2) a registered nurse or a licensed practical nurse; (3) any qualified medical technician, including, but not limited to, an emergency medical technician-intermediate, mobile intensive care technician, an emergency medical technician-intermediate defibrillator, an advanced emergency medical technician or a paramedic, as those terms are defined in K.S.A. 65-6112, and amendments thereto, authorized by medical protocol or (4) a phlebotomist.

(d) A law enforcement officer may direct a medical professional described in this section to draw a sample of blood from a person:

- (1) If the person has given consent and meets the requirements of subsection (b);
- (2) if medically unable to consent, if the person meets the requirements of paragraph (2) of subsection (b); or
- (3) if the person refuses to submit to and complete a test, if the person meets the requirements of paragraph (2) of subsection (b).

(e) When so directed by a law enforcement officer through a written statement, the medical professional shall withdraw the sample as soon as practical and shall deliver the sample to the law enforcement officer or another law enforcement officer as directed by the requesting law enforcement officer as soon as practical, provided the collection of the sample does not jeopardize the person's life, cause serious injury to the person or seriously impede the person's medical assessment, care or treatment. The medical professional authorized herein to withdraw the blood and the medical care facility where the blood is drawn may act on good faith that the requirements have been met for directing the withdrawing of blood once presented with the written statement provided for under this subsection. The medical professional shall not require the person to sign any additional consent or waiver form. In such a case, the person authorized to withdraw blood and the medical care facility shall not be liable in any action alleging lack of consent or lack of informed consent.

(f) Such sample or samples shall be an independent sample and not be a portion of a sample collected for medical purposes. The person collecting the blood sample shall complete the collection portion of a document provided by law enforcement.

(g) If a person must be restrained to collect the sample pursuant to this section, law enforcement shall be responsible for applying any such restraint utilizing acceptable law enforcement restraint practices. The restraint shall be effective in controlling the person in a manner not to jeopardize the person's safety or that of the medical professional or

KANSAS STATUTES

8-1001 (Continued)

attending medical or health care staff during the drawing of the sample and without interfering with medical treatment.

(h) A law enforcement officer may request a urine sample upon meeting the requirements of paragraph (1) of subsection (b) and shall request a urine sample upon meeting the requirements of paragraph (2) of subsection (b).

(i) If a law enforcement officer requests a person to submit to a test of urine under this section, the collection of the urine sample shall be supervised by: (1) A person licensed to practice medicine and surgery, licensed as a physician's assistant, or a person acting under the direction of any such licensed person; (2) a registered nurse or a licensed practical nurse; or (3) a law enforcement officer of the same sex as the person being tested. The collection of the urine sample shall be conducted out of the view of any person other than the persons supervising the collection of the sample and the person being tested, unless the right to privacy is waived by the person being tested. When possible, the supervising person shall be a law enforcement officer. The results of qualitative testing for drug presence shall be admissible in evidence and questions of accuracy or reliability shall go to the weight rather than the admissibility of the evidence. If the person is medically unable to provide a urine sample in such manner due to the injuries or treatment of the injuries, the same authorization and procedure as used for the collection of blood in subsections (d) and (e) shall apply to the collection of a urine sample.

(j) No law enforcement officer who is acting in accordance with this section shall be liable in any civil or criminal proceeding involving the action.

(k) Before a test or tests are administered under this section, the person shall be given oral and written notice that: (1) Kansas law requires the person to submit to and complete one or more tests of breath, blood or urine to determine if the person is under the influence of alcohol or drugs, or both;

(2) the opportunity to consent to or refuse a test is not a constitutional right;

(3) there is no constitutional right to consult with an attorney regarding whether to submit to testing;

(4) if the person refuses to submit to and complete any test of breath, blood or urine hereafter requested by a law enforcement officer, the person may be charged with a separate crime of refusing to submit to a test to determine the presence of alcohol or drugs, which carries criminal penalties that are greater than or equal to the criminal penalties for the crime of driving under the influence, if such person has:

(A) Any prior test refusal as defined in K.S.A. 8-1013, and amendments thereto, which occurred: (i) On or after July 1, 2001; and (ii) when such person was 18 years of age or older; or

(B) any prior conviction for a violation of K.S.A. 8-1567 or 8-2,144, and amendments thereto, or a violation of an ordinance of any city or resolution of any county which prohibits the acts that such section prohibits, or entering into a diversion agreement in lieu of further criminal proceedings on a complaint alleging any such violations, which occurred: (i) On or after July 1, 2001; and (ii) when such person was 18 years of age or older;

(5) if the person refuses to submit to and complete any test of breath, blood or urine hereafter requested by a law enforcement officer, the person's driving privileges will be suspended for one year for the first or subsequent occurrence;

(6) if the person submits to and completes the test or tests and the test results show:

KANSAS STATUTES

8-1001 (Continued)

(A) An alcohol concentration of .08 or greater, the person's driving privileges will be suspended for 30 days for the first occurrence and one year for the second or subsequent occurrence; or

(B) an alcohol concentration of .15 or greater, the person's driving privileges will be suspended for one year for the first or subsequent occurrence;

(7) refusal to submit to testing may be used against the person at any trial on a charge arising out of the operation or attempted operation of a vehicle while under the influence of alcohol or drugs, or both;

(8) the results of the testing may be used against the person at any trial on a charge arising out of the operation or attempted operation of a vehicle while under the influence of alcohol or drugs, or both; and

(9) after the completion of the testing, the person has the right to consult with an attorney and may secure additional testing, which, if desired, should be done as soon as possible and is customarily available from medical care facilities willing to conduct such testing.

(l) If a law enforcement officer has reasonable grounds to believe that the person has been driving a commercial motor vehicle, as defined in K.S.A. 8-2,128, and amendments thereto, while having alcohol or other drugs in such person's system, the person shall also be provided the oral and written notice pursuant to K.S.A. 8-2,145, and amendments thereto. Any failure to give the notices required by K.S.A. 8-2,145, and amendments thereto, shall not invalidate any action taken as a result of the requirements of this section. If a law enforcement officer has reasonable grounds to believe that the person has been driving or attempting to drive a vehicle while having alcohol or other drugs in such person's system and such person was under 21 years of age, the person also shall be given the notices required by K.S.A. 8-1567a, and amendments thereto. Any failure to give the notices required by K.S.A. 8-1567a, and amendments thereto, shall not invalidate any action taken as a result of the requirements of this section.

(m) After giving the foregoing information, a law enforcement officer shall request the person to submit to testing. The selection of the test or tests shall be made by the officer. If the test results show a blood or breath alcohol concentration of .08 or greater, the person's driving privileges shall be subject to suspension, or suspension and restriction, as provided in K.S.A. 8-1002 and 8-1014, and amendments thereto.

(n) The person's refusal shall be admissible in evidence against the person at any trial on a charge arising out of the alleged operation or attempted operation of a vehicle while under the influence of alcohol or drugs, or both. The person's refusal shall be admissible in evidence against the person at any trial on a charge arising out of the alleged violation of 8-1025, and amendments thereto.

(o) If a law enforcement officer had reasonable grounds to believe the person had been driving a commercial motor vehicle, as defined in K.S.A. 8-2,128, and amendments thereto, and the test results show a blood or breath alcohol concentration of .04 or greater, the person shall be disqualified from driving a commercial motor vehicle, pursuant to K.S.A. 8-2,142, and amendments thereto. If a law enforcement officer had reasonable grounds to believe the person had been driving a commercial motor vehicle, as defined in K.S.A. 8-2,128, and amendments thereto, and the test results show a blood or breath alcohol concentration of .08 or greater, or the person refuses a test, the person's driving privileges shall be subject to suspension, or suspension and restriction, pursuant to this section, in

KANSAS STATUTES

8-1001 (Continued)

addition to being disqualified from driving a commercial motor vehicle pursuant to K.S.A. 8-2,142, and amendments thereto.

(p) An officer shall have probable cause to believe that the person operated a vehicle while under the influence of alcohol or drugs, or both, if the vehicle was operated by such person in such a manner as to have caused the death of or serious injury to a person. In such event, such test or tests may be made pursuant to a search warrant issued under the authority of K.S.A. 22-2502, and amendments thereto, or without a search warrant under the authority of K.S.A. 22-2501, and amendments thereto.

(q) Failure of a person to provide an adequate breath sample or samples as directed shall constitute a refusal unless the person shows the inability caused by a medical condition unrelated to any ingested alcohol or drugs.

(r) It shall not be a defense that the person did not understand the written or oral notice required by this section.

(s) No test results shall be suppressed because of technical irregularities in the consent or notice required pursuant to this act.

(t) Nothing in this section shall be construed to limit the admissibility at any trial of alcohol or drug concentration testing results obtained pursuant to a search warrant.

(u) Upon the request of any person submitting to testing under this section, a report of the results of the testing shall be made available to such person. (v) This act is remedial law and shall be liberally construed to promote public health, safety and welfare.

(w) As used in this section, "serious injury" means a physical injury to a person, as determined by law enforcement, which has the effect of, prior to the request for testing:

(1) Disabling a person from the physical capacity to remove themselves from the scene;

(2) renders a person unconscious;

(3) the immediate loss of or absence of the normal use of at least one limb;

(4) an injury determined by a physician to require surgery; or

(5) otherwise indicates the person may die or be permanently disabled by the injury.

6. If you **do not have any prior occurrence, whether on, before or after July 1, 2001**, in which you refused or failed a test, or were convicted or granted diversion on a charge of driving under the influence of alcohol and/or drugs or the crime of refusing to submit to a test, or were convicted of driving a commercial motor vehicle with an alcohol concentration of .04 or more, and you **fail** a test by submitting to and completing a test or tests and the test results show an alcohol concentration of .08 or greater, your driving privileges will be suspended for 30 days if the test result is less than .15 and will be suspended for one year if the test result is .15 or greater.
7. If you **have any prior occurrence, whether on, before or after July 1, 2001**, in which you refused or failed a test, or were convicted or granted diversion on a charge of driving under the influence of alcohol and/or drugs or the crime of refusing to submit to a test, or were convicted of driving a commercial motor vehicle with an alcohol concentration of .04 or more, and you **fail** a test by submitting to and completing a test or tests and the test results show an alcohol concentration of .08 or greater, your driving privileges will be suspended for one year.
8. Refusal to submit to testing may be used against you at any trial on a charge arising out of the operation or attempted operation of a vehicle while under the influence of alcohol or drugs, or both.
9. The results of the testing may be used against you at any trial on a charge arising out of the operation or attempted operation of a vehicle while under the influence of alcohol or drugs, or both.

Entry into a diversion agreement in lieu of prosecution on a prior occasion is treated as a prior "alcohol or drug-related conviction," pursuant to K.S.A. 8-1013(b)(2). You may request a copy of your driving record in writing from Central Office Operations, Division of Vehicles, Kansas Department of Revenue at PO Box 12021, Topeka, Kansas, 66601 or visit <http://www.kansas.gov/mvr> to request a copy of your driving record online.

Second Occurrence: 1 year suspension & 3 year Ignition Interlock restriction
Third Occurrence: 1 year suspension & 4 year Ignition Interlock restriction
Fourth Occurrence: 1 year suspension & 5 year Ignition Interlock restriction
Fifth or Subsequent Occurrence: 1 year suspension & 10 year Ignition Interlock restriction

Second Occurrence: 1 year suspension & 1 year Ignition Interlock restriction
Third Occurrence: 1 year suspension & 2 year Ignition Interlock restriction
Fourth Occurrence: 1 year suspension & 3 year Ignition Interlock restriction
Fifth or Subsequent Occurrence: 1 year suspension & 10 year Ignition Interlock restriction

If paragraph 4 of the certification on the reverse side indicates you failed a test and the test result was .15 or above, the following action will be taken on your driving privileges:

First Occurrence: 1 year suspension & 1 year Ignition Interlock restriction
Second Occurrence: 1 year suspension & 2 year Ignition Interlock restriction
Third Occurrence: 1 year suspension & 3 year Ignition Interlock restriction
Fourth Occurrence: 1 year suspension & 4 year Ignition Interlock restriction

(p) Such review shall be in accordance with this section and the Kansas judicial review act. To the extent that this section and any other provision of law conflicts, this section shall prevail. The petition for review shall be filed within 14 days after the effective date of the order. The court shall take testimony, examine the facts of the case and determine whether the petitioner is entitled to driving privileges or whether the petitioner's driving privileges are subject to suspension or suspension and restriction under the provisions of this act. If the court finds that the grounds for action by the agency have been met, the court shall affirm the agency action.

(q) Upon review, the licensee shall have the burden to show that the decision of the agency should be set aside.

(r) Notwithstanding the requirement to issue a temporary license in K.S.A. 8-1002, and amendments thereto, and the requirements to extend the temporary license in this section, any such temporary driving privileges are subject to restriction, suspension, revocation or cancellation as provided in K.S.A. 8-1014, and amendments thereto, or for other cause.

(t) The facts found by the hearing officer or by the district court upon a petition for review shall be independent of the determination of the same or similar facts in the adjudication of any criminal charges arising out of the same occurrence. The disposition of those criminal charges shall not affect the suspension or suspension and restriction to be imposed under this section.

(u) All notices affirming or canceling a suspension under this section, all notices of a hearing held under this section and all issuances of temporary driving privileges pursuant to this section shall be sent by first-class mail and a United States post office certificate of mailing shall be obtained therefor. All notices so mailed shall be deemed received three days after mailing, except that this provision shall not apply to any licensee where such application would result in a manifest injustice.

(v) The provisions of K.S.A. 60-206, and amendments thereto, regarding the computation of time shall be applicable in determining the time for requesting an administrative hearing as set out in subsection (a) and to the time for filing a petition for review pursuant to subsection (o) and K.S.A. 8-259, and amendments thereto.

Any enhanced penalty imposed shall not exceed the maximum sentence allowable by law. During the service of the enhanced penalty, the judge may order the person on house arrest, work release or other conditional release.

(d) The court may establish the terms and time for payment of any fines, fees, assessments and costs imposed pursuant to this section. Any assessments and costs shall be required to be paid not later than 90 days after imposed, and any remainder of the fine shall be paid prior to the final release of the defendant by the court.

(e) In lieu of payment of a fine imposed pursuant to this section, the court may order that the person perform community service specified by the court. The person shall receive a credit on the fine imposed in an amount equal to \$5 for each full hour spent by the person in the specified community service. The community service ordered by the court shall be required to be performed not later than one year after the fine is imposed or by an earlier date specified by the court. If by the required date the person performs an insufficient amount of community service to reduce to zero the portion of the fine required to be paid by the person, the remaining balance of the fine shall become due on that date.

person was 18 years of age or older. Nothing in this provision shall be construed as preventing any court from considering any convictions or diversions occurring during the person's lifetime in determining the sentence to be imposed within the limits provided for a first, second, third, fourth or subsequent offense;

(2) any convictions for a violation of the following sections which occurred during a person's lifetime shall be taken into account, but only convictions occurring when such person was 18 years of age or older: (A) This section; (B) driving a commercial motor vehicle under the influence, K.S.A. 8-2,144, and amendments thereto; (C) operating a vessel under the influence of alcohol or drugs, K.S.A. 32-1131, and amendments thereto; (D) involuntary manslaughter while driving under the influence of alcohol or drugs, K.S.A. 21-3442, prior to its repeal, or subsection (a)(3) of K.S.A. 2011 Supp. 21-5405, and amendments thereto; and (E) aggravated vehicular homicide, K.S.A. 21-3405a, prior to its repeal, or vehicular battery, K.S.A. 21-3405b, prior to its repeal, if the crime was committed while committing a violation of K.S.A. 8-1567, and amendments thereto;

(3) "conviction" includes: (A) Entering into a diversion agreement in lieu of further criminal proceedings on a complaint alleging a violation of a crime described in subsection (h)(2); (B) conviction of a violation of an ordinance of a city in this state, a resolution of a county in this state or any law of another state which would constitute a crime described in subsection (h)(1) or (h)(2); and (C) receiving punishment under the uniform code of military justice or Kansas code of military justice for an act which was committed on a military reservation and which would constitute a crime described in subsection (h)(1) or (h)(2) if committed off a military reservation in this state;

(5) multiple convictions of any crime described in subsection (h)(1) or (h)(2) arising from the same arrest shall only be counted as one conviction;

(6) the prior conviction that is an element of the crime of refusing to submit to a test to determine the presence of alcohol or drugs shall not be used for the purpose of determining whether a conviction is a first, second, third or subsequent conviction in sentencing under this section and shall not be considered in determining the sentence to be imposed within the limits provided for a first, second, third or subsequent offense; and

(7) a person may enter into a diversion agreement in lieu of further criminal proceedings for a violation of this section, or an ordinance which prohibits the acts of this section, only once during the person's lifetime.

(i) Upon conviction of a person of a violation of this section or a violation of a city ordinance or county resolution prohibiting the acts prohibited by this section, the division, upon receiving a report of conviction, shall suspend, restrict or suspend and restrict the person's driving privileges as provided by K.S.A. 8-1014, and amendments thereto.

(j) (1) Nothing contained in this section shall be construed as preventing any city from enacting ordinances, or any county from adopting resolutions, declaring acts prohibited or made unlawful by this act as unlawful or prohibited in such city or county and prescribing penalties for violation thereof.

(2) The minimum penalty prescribed by any such ordinance or resolution shall not be less than the minimum penalty prescribed by this section for the same violation, and the maximum penalty in any such ordinance or resolution shall not exceed the maximum penalty prescribed for the same violation.

(3) An ordinance may grant to a municipal court jurisdiction over a violation of such ordinance which is concurrent with the jurisdiction of the district court over a violation of this section, notwithstanding that the elements of such ordinance violation are the same as the elements of a violation of this section that would constitute, and be punished as, a felony.

(4) Any such ordinance or resolution shall authorize the court to order that the convicted person pay restitution to any victim who suffered loss due to the violation for which the person was convicted.

(k) (1) Upon the filing of a complaint, citation or notice to appear alleging a person has violated a city ordinance prohibiting the acts prohibited by this section, and prior to conviction thereof, a city attorney shall request and shall receive from the:

(l) No plea bargaining agreement shall be entered into nor shall any judge approve a plea bargaining agreement entered into for the purpose of permitting a person charged with a violation of this section, or a violation of any ordinance of a city or resolution of any county in this state which prohibits the acts prohibited by this section, to avoid the mandatory penalties established by this section or by the ordinance. For the purpose of this subsection, entering into a diversion agreement pursuant to K.S.A. 12-4413 *et seq.* or 22-2906 *et seq.*, and amendments thereto, shall not constitute plea bargaining.

(m) As used in this section, "imprisonment" shall include any restrained environment in which the court and law enforcement agency intend to retain custody and control of a defendant and such environment has been approved by the board of county commissioners or the governing body of a city.

(n) On and after July 1, 2012, the amount of \$250 from each fine imposed pursuant to this section shall be remitted by the clerk of the district court to the state treasurer in accordance with the provisions of K.S.A. 75-4215, and amendments thereto. Upon receipt of each such remittance, the state treasurer shall credit the entire amount to the community corrections supervision fund established by K.S.A. 2011 Supp. 75-52,113, and amendments thereto.

The determination by the secretary that the person either is not to be admitted into the designated facility or is to be transferred from the designated facility is not subject to review. The sheriff shall be responsible for all transportation expenses to and from the state correctional facility.

(3) In addition, for any conviction pursuant to subsection (b)(1)(C), (b)(1)(D) or (b)(1)(E), at the time of the filing of the judgment form or journal entry as required by K.S.A. 22-3426 or K.S.A. 2011 Supp. 21-6711, and amendments thereto, the court shall cause a certified copy to be sent to the officer having the offender in charge. The court shall determine whether the offender, upon release from imprisonment, shall be supervised by community correctional services or court services based upon the risk and needs of the offender. The risk and needs of the offender shall be determined by use of a risk assessment tool specified by the Kansas sentencing commission. The law enforcement agency maintaining custody and control of a defendant for imprisonment shall cause a certified copy of the judgment form or journal entry to be sent to the supervision office designated by the court and upon expiration of the term of imprisonment shall deliver the defendant to a location designated by the supervision office designated by the court. After the term of imprisonment imposed by the court, the person shall be placed on supervision to community correctional services or court services, as determined by the court, for a mandatory one-year period of supervision, which such period of supervision shall not be reduced. During such supervision, the person shall be required to participate in a multidisciplinary model of services for substance use disorders facilitated by a department of social and rehabilitation services designated care coordination agency to include assessment and, if appropriate, referral to a community based substance use disorder treatment including recovery management and mental health counseling as needed. The multidisciplinary team shall include the designated care coordination agency, the supervision officer, the social and rehabilitation services department designated treatment provider and the offender. Any violation of the conditions of such supervision may subject such person to revocation of supervision and imprisonment in jail for the remainder of the period of imprisonment, the remainder of the supervision period, or any combination or portion thereof.

The person shall be required to follow any recommendation made by the provider after such evaluation, unless otherwise ordered by the court.

Any enhanced penalty imposed shall not exceed the maximum sentence allowable by law. During the service of the enhanced penalty, the judge may order the person on house arrest, work release or other conditional release.

(d) If a person is charged with a violation of this section involving drugs, the fact that the person is or has been entitled to use the drug under the laws of this state shall not constitute a defense against the charge.

(e) The court may establish the terms and time for payment of any fines, fees, assessments and costs imposed pursuant to this section. Any assessment and costs shall be required to be paid not later than 90 days after imposed, and any remainder of the fine shall be paid prior to the final release of the defendant by the court.

The community service ordered by the court shall be required to be performed not later than one year after the fine is imposed or by an earlier date specified by the court. If by the required date the person performs an insufficient amount of community service to reduce to zero the portion of the fine required to be paid by the person, the remaining balance of the fine shall become due on that date.

(g) Prior to filing a complaint alleging a violation of this section, a prosecutor shall request and shall receive from the: (1) Division a record of all prior convictions obtained against such person for any violations of any of the motor vehicle laws of this state; and (2) Kansas bureau of investigation central repository all criminal history record information concerning such person.

(h) The court shall report every conviction of a violation of this section and every diversion agreement entered into in lieu of further criminal proceedings on a complaint alleging a violation of this section to the division. Prior to sentencing under the provisions of this section, the court shall request and shall receive from the division a record of all prior convictions obtained against such person for any violations of any of the motor vehicle laws of this state.

(i) For the purpose of determining whether a conviction is a first, second, third, fourth or subsequent conviction in sentencing under this section:

(1) Convictions for a violation of this section, or a violation of an ordinance of any city or resolution of any county which prohibits the acts that this section prohibits, or entering into a diversion agreement in lieu of further criminal proceedings on a complaint alleging any such violations, shall be taken into account, but only convictions or diversions occurring on or after July 1, 2001. Nothing in this provision shall be construed as preventing any court

For the purpose of this subsection, entering into a diversion agreement pursuant to K.S.A.12-4413 et seq. or 22-2906 et seq., and amendments thereto, shall not constitute plea bargaining.

Alcohol Properties & Production

- Clear and colorless liquid
- Water-loving (hydrophilic), easily mixes with water
- Volatile liquid: can exist as a gas or a liquid
- Instrument detects the "H-C-OH" structure of alcohol.

Alcohol is the chemical name for a number of compounds having one hydroxyl group attached to one or more carbon atoms. The above picture shows the chemical structure of ethyl alcohol. The 'H' is a hydrogen molecule, the 'C' is a carbon molecule and the 'OH' is an oxygen molecule attached to a hydrogen molecule.

Types of Alcohol

Ethyl alcohol: This is the type of alcohol found in alcoholic beverages. Other common names include grain alcohol, neutral spirits and ethanol. Its chemical formula C_2H_5OH is shown above. It is a clear, colorless liquid that imparts a burning sensation to the mouth and throat when swallowed. Pure ethanol has a very slight, pleasant odor; the odor commonly associated with an alcoholic beverage usually comes from the raw material used to make the drink, or from added flavoring. It is freely soluble in water.

Ethyl alcohol has a depressant effect on the body. It is generally harmless when consumed moderately, but can be highly poisonous when consumed in large quantities.

Ethyl alcohol can be produced both synthetically and by fermentation of sugars. When it is to be consumed as a beverage, legally it must be produced by fermentation. Synthetically produced alcohols, used for industrial purposes, are typically denatured to make them unacceptable for human consumption. Denaturing involves the addition of a small percentage of unpleasant or poisonous substances. Their removal to make the alcohol fit for human use, would be extremely time consuming and costly.

Alcohol Properties & Production

Methyl alcohol: Methyl alcohol is commonly known as wood alcohol. It is usually made synthetically. It is also known as methanol. Its chemical formula is CH_3OH . Methyl alcohol is a colorless liquid with a wine-like odor and a burning taste. It is used in the manufacture of industrial solvents and chemicals and is highly poisonous if swallowed or inhaled. Ethyl alcohol can actually be used as a treatment for methanol poisoning. It competes with the methanol for the enzymes used to break down both methanol and ethanol. Slowing down the breakdown of methanol gives the body time to eliminate any toxic by-products.

Endogenous alcohol: Endogenous alcohol refers to alcohol that exists “normally” in the body regardless of whether or not a person consumes alcoholic beverages. There is considerable disagreement among experts regarding the existence of “normal” alcohol in the body; however, both “normal” methyl and ethyl alcohol have been reported in the research literature. The values reported have not exceeded a BAC of 0.003 g/210L and generally are less than 0.001 g/210L. These values are too low to be of any medicolegal significance and are of academic interest only.

Other alcohols: There are many other types of alcohols used for various purposes. For example, isopropyl alcohol is used as rubbing alcohol.

Production of Alcohol

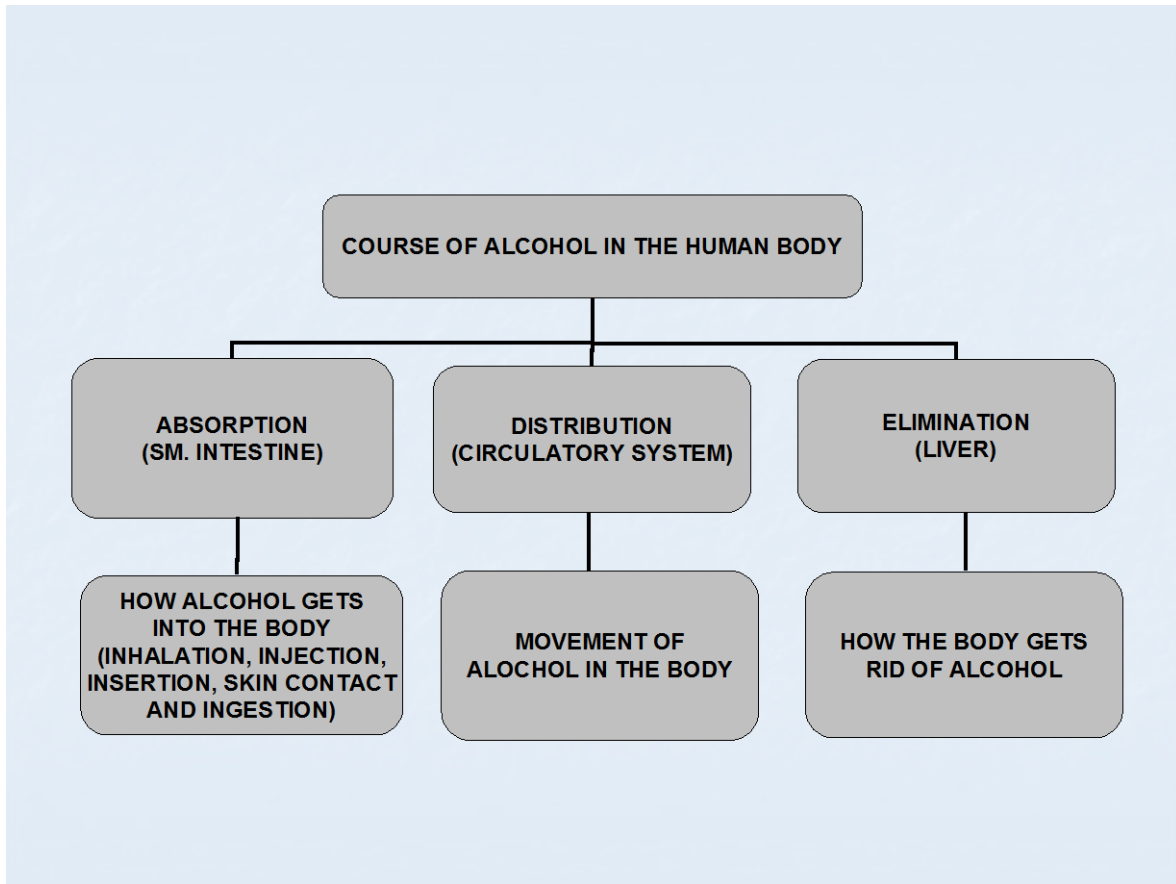

Sources: Any material can serve as the basic material for alcohol as long as it contains 12-15% sugar. Good examples of this would be fruit juices, malt or cereal grain extract, vegetable pulp (potato, cactus) and molasses.

Fermentation: Fermentation is the process by which all drinking alcohols are produced. Yeast from the air, or added as a pure culture, produces alcohol and carbon dioxide by fermenting the sugars in the raw material. The maximum alcohol content of a fermented beverage is 14-15% by volume; higher alcohol contents are produced by the process of distillation.

Distillation: Whiskey, gin, rum, brandy, etc., attain high alcohol contents through the process of distillation. Alcohol boils at 78.3°C (173°F) and water at 100°C (212°F). When a mixture of alcohol and water is heated, the alcohol boils at a lower temperature. This resultant steam is caught, cooled and may be repeated until nearly pure ethanol is obtained.

Proof system: In the United States, the proof of an alcoholic beverage is twice the percentage of alcohol by volume. Thus, an 86-proof bottle of whiskey contains 43% of alcohol by volume. Most alcoholic beverages have a maximum of approximately 50% alcohol by volume; the remainder consists of water and flavoring agents (congeners). For example, beer has a relatively low alcohol content and is approximately 90% water.

Physiology of Alcohol

Absorption:

Most likely route. Alcohol is typically swallowed; therefore, the most common route of absorption is through the gastrointestinal (GI) tract.

Absorption from GI tract. Alcohol is absorbed by various parts of the GI tract as follows:

- * **Mouth.** Alcohol can be absorbed through the mouth lining; however, the amount is normally minor since fluid leaves the mouth rapidly. Normal body processes will eliminate residual mouth alcohol within fifteen minutes.
- * **Stomach.** About 20% of the alcohol is absorbed directly into the blood stream through the stomach wall. The exact amount is variable and influenced by the emptying time of the stomach. In contrast, no other substances (even liquids) are absorbed from the stomach.
- * **Small intestine.** The remainder, approximately 75-80%, of the alcohol is absorbed from the **small intestine**; very little gets past the duodenum (the first 8 to 10 inches of the small intestine).

Physiology of Alcohol

- * **Rate.** The rate of absorption varies somewhat from person to person and for the same person at different times depending on the condition of their body. However, alcohol begins to pass into the blood stream within 1 to 2 minutes after it is consumed, most alcohol is absorbed within 15 minutes, nearly 90% is absorbed within 1 hour, and nearly all is absorbed in 1.5 hours.
- * **Absorption rate factors.** Absorption through the stomach wall is slow and represents only a portion of total alcohol intake. Absorption through the small intestine is rapid. Therefore, anything that increases emptying time of the stomach increases the absorption rate; anything that delays emptying time slows the absorption rate.
- * **Dilution.** Absorption is slow in weak and strong beverages. It is fastest for a 20% water solution. Apparently, very strong beverages irritate the gastrointestinal walls and slow down absorption.
- * **Food in the stomach.** Food in the stomach delays absorption. Absorption is slowed since stomach emptying time is delayed. This applies to eating while drinking and to eating before drinking.

Less likely routes. Alcohol may also be absorbed by inhalation, injection or direct insertion into the bladder or rectum. Absorption through direct skin contact to achieve a high BAC is impossible.

- * **Inhalation.** Ethyl alcohol is readily absorbed by lung tissue, and both children and animals have become severely intoxicated by breathing alcohol fumes in confined spaces. Approximately 62% of the inhaled alcohol will be absorbed into the blood regardless of the concentration in the air or the rate of ventilation. However, a concentration of alcohol high enough to produce a significant rise in blood levels is very irritating. Investigators have shown that inhalation of a 0.9% alcohol-air mixture (about the highest tolerable limit) will produce a BAC of 0.045 g/210L only with forced respirations of 3 to 4 hours duration. Such conditions would not be obtained by industrial exposure to alcohol solvents.
- * **Injection.** Alcohol is detectable in the blood within 5 to 15 minutes after injection into a muscle or skin.
- * **Insertion.** When given as an enema, alcohol is readily absorbed by the large intestine (colon). Less than 10% of alcohol inserted in the bladder will be absorbed because alcohol passes more readily from the blood to the urine than from the urine to the blood.
- * **Skin contact.** In experimental situations, no detectable blood levels have been obtained from alcohol rubs. If absorbed via this route, apparently the rate of absorption is less than the rate of elimination.

Physiology of Alcohol

Distribution:

Pathway. Alcohol is absorbed into the blood through the walls of the stomach and small intestine, travels through the portal vein to the liver, and then travels with the circulatory system to the heart, lungs and back to the heart. It is then pumped from the heart to all parts of the body.

Equilibrium. Alcohol has an attraction for water and distributes itself throughout the body organs and tissues in relation to their water content. Blood circulates through the body at a rate of 3 to 4.5 liters per minute. Organs, such as the brain, liver and kidney, have a large blood supply, and therefore have a greater exposure to alcohol initially. When absorption and distribution are complete, equilibrium is achieved, that is, alcohol is even with the fluid content. This occurs typically within one or two hours after ingestion.

Elimination:

Method. Alcohol is eliminated from the body both by metabolism (indirect method) and by excretion (direct method). The indirect method of ethanol break down is illustrated in the picture below. The ethanol is broken down into the intermediate compound called acetaldehyde by the enzyme alcohol dehydrogenase (ADH). Acetaldehyde is a known carcinogen but is generally short lived. The enzyme aldehyde dehydrogenase (ALDH) reacts in response to the acetaldehyde to form acetate (also known as acetic acid). Once acetate is formed it is broken down into carbon dioxide and water- generally in tissues other than the liver.

Ethanol Breakdown in the Human Body:

Metabolism. Most alcohol (between 90 to 95%) is broken down into carbon dioxide and water. **This process takes place in the liver.** Since this breakdown provides the body with calories, alcohol is considered a food, although it has no direct food value.

Excretion. A small amount of alcohol leaves the body directly through breath, urine, tears, saliva, perspiration, etc. The amount expelled in this way is generally about 5% and rarely exceeds 10% of the quantity absorbed.

Physiology of Alcohol

Rate of elimination. As soon as alcohol is absorbed into the blood system and travels to the liver, the body immediately starts to eliminate it. The **average rate of elimination** is reported as approximately **0.015 g/210L per hour** and varies between .007 and 0.037g/210L per hour. At very low BAC's, the average rate of elimination is about 0.01g/210L per hour. For a man weighing 150 pounds, the quantity eliminated in one hour is about 7 g or 2/3 oz. of 100-proof whiskey. Although there is some controversy in the literature, the majority of the scientific evidence indicates that the rate of elimination is essentially linear; that is, for any given person at a given time, the rate of alcohol elimination per hour will be essentially constant. The rate of elimination in regards to alcohol consumed varies from 1/2 to 1/3 ounce of pure alcohol per hour.

Elimination rate factors. In general, the rate of elimination is not affected by stimulants, disease states, or exercise. Where changes in rates have been noted, they are too small to be of any practical value. Because of the small quantity excreted directly, any attempt aimed at eliminating alcohol through increasing breathing rate, urine, or perspiration has little to no effect.

Physiology of Alcohol

Alcohol in the human body

According to concentration in the brain, alcohol first impairs judgment, then causes muscular incoordination, stupor and finally unconsciousness.

Primary Lobule of the Lung
Diameter of circle = 1/50th inch

Blood vessels in the lungs end in the network of capillaries in the walls of the alveoli.

Alcohol from the blood is imparted to the alveolar breath.

Alveolar breath contains $1/2100^{\text{th}}$ as much alcohol as the blood.

Henry's Law

Basis for all breath testing

Definition:

Weight of any gas that dissolves in a definite volume of liquid is directly proportional to the vapor pressure that the gas exerts above the liquid (dependent on temperature).

Scientists were able to dose individuals with alcohol and determine the ratio of blood to breath, which is 1 mL of blood to 2100 mL of breath (1:2100)

Meaning

If one shakes a closed bottle containing an alcohol solution and air, the amount of alcohol in the air will build up to a certain point and stop. This point is what chemists call equilibrium. At equilibrium for any given temperature and pressure, there will be a definite ratio between the amount of alcohol in the air and in the water. This ratio will be the same for any given temperature and atmospheric pressure; the higher the temperature, the more alcohol will be in the air.

Three things required for Henry's Law to apply:

1. **Closed container**

For breath testing purposes deep lung air (alveolar air) best simulates a closed container

2. **Volatile substance**

Alcohol in the blood

3. **Constant temperature**

The average temperature of human breath is 34.0°C

Application to breath testing

Alcohol in alveolar air comes into equilibrium with alcohol in the blood. Thus, if the constant is known and the amount of alcohol in the breath can be measured, the amount of alcohol in the blood can be determined. The average temperature at which the breath leaves the mouth is 34.0° Celsius (C). This ratio was found to be approximately 2100:1. Thus, 1 milliliter (mL) of blood will contain the same weight of alcohol as 2100 mL of the alveolar air with which it has come to equilibrium.

Conversion: $\frac{2100}{1} \times \frac{100}{100} = \frac{210,000}{100}$ milliliters or 210 liters of breath per 100 milliliters of blood

Now we have the statute's definition of alcohol concentration and we could report the results as the number of grams of alcohol per 210 liters of breath.

Summary Review

1. Alcohol is volatile; it can exist as a liquid or gas, depending on temperature.
2. The type of alcohol that is consumed is ethyl alcohol, also known as ethanol.
3. Most of the ingested alcohol is absorbed through the small intestine, approximately 75%.
4. Most alcohol is eliminated through metabolism in the liver, approximately 95%.
5. Average alcohol elimination rate for a person is considered to be about .015 g/210L.
6. Fatal level is considered to be about 0.450 g/210 L.
7. This picture illustrates equilibrium. When the containers are closed they contain only their shape. When the containers are opened to each other then they mix together until they are balanced (or at equilibrium).
8. Equilibrium occurs between the alcohol in the blood and nearly all body tissues. For breath testing purposes we look at the equilibrium between the alcohol in the blood and the alcohol in the deep lung (alveolar) air.

9. At 34.0°C, 1 milliliter of blood will contain the same weight of alcohol as 2100 milliliters of alveolar air.
10. Alcohol concentration means the number of grams of alcohol per 100 milliliters of blood or per 210 liters of breath.
11. The basis for human breath alcohol testing is Henry's Law. It has three requirements: closed container, volatile substance, and constant temperature.

Intoxilyzer 8000

GENERAL INFORMATION ABOUT THE INTOXILYZER 8000 EBAT DEVICE

The Intoxilyzer 8000 uses the concept that alcohol molecules absorb light energy at specific wavelengths to measure ethyl alcohol concentration in breath samples. The wavelengths of infrared (IR) light used are 3 and 9 micron.

The heart of the Intoxilyzer 8000 instrument is its self contained heated optical bench. This optical bench consists of the heated sample chamber, pulsed IR light source and the pyroelectric detector. The sample chamber within the Intoxilyzer 8000 consists of two preheat chambers and the final sample chamber. At one end of the chamber the light source, a quartz iodide lamp, emits IR light energy. This energy is directed through the chamber by a lens. At the other end of the chamber is a pyroelectric detector which changes the heat energy of the light source into an electrical response. This electrical response is then used to calculate the breath alcohol concentration (BrAC) of the sample.

The determination of the BrAC is based on the amount of light energy striking the detector. When no alcohol is present the IR light passes through the chamber unaffected creating a certain voltage level. This can be called X. As a sample with alcohol is introduced, some of the IR light is absorbed. As the alcohol level increases, the amount of light passing through the chamber reaching the detector decreases. This new level of voltage can be called Y. The difference between X and Y represents the concentration of alcohol in the sample. The greater the difference between the X and Y values the higher the BrAC reading.

There are other chemical structures that absorb light energy at similar wavelengths as alcohol. These chemical structures are known as interferents, such as acetone. The Intoxilyzer 8000 will detect a difference in the readings at the 3 and 9 micron wavelengths and will abort the test giving the message 'Interferent Detect'. The following pages show examples of several other informational messages the Intoxilyzer 8000 will give.

Dry Gas Cylinder Information

- a. The cylinders are purchased and tested by KDHE prior to being furnished to any law enforcement agency. Every cylinder is verified and must read within the acceptable external standard check range, 0.075 to 0.085 g/210 L, inclusive, or the cylinder is rejected.
- b. The cylinders have a shelf life of approximately two years. The cylinders are replaced prior to their expiration date.
- c. The cylinders are furnished at site inspections or mailed at the agency's request.
- d. They are made of steel and are non-refillable. They can be recycled or land filled after the pressure is released. Your Agency or Device Custodian has an extractor device used to ventilate tanks to remove the pressure which allows for safe disposal.
- e. The cylinders contain ethanol (ethyl alcohol) and nitrogen. The nitrogen is used as a propellant to help carry the ethanol into the instrument.
- f. The cylinders are considered a hazardous material due to the pressure in the cylinder not the contents. In order to be able to ship the cylinders you must be Department of Transportation (DOT) Hazardous Materials Shipping Certified. KDHE Breath Alcohol Program staff has obtained the required training to be able to ship these cylinders.
- g. When shipping an instrument for repair the dry gas cylinder **NEEDS TO BE REMOVED** to prevent fines and/or added expenses for shipping.

*Note: If the test is aborted during the data entry portion the instrument will give a series of hi-lo tones and display 'Sequence Aborted' but no printout will be given. No printout is given because the instrument is not in the testing sequence.
